Exemption from academic studies based on non-academic studies - The case in Israel

Presentation for Conference "Recognition Culture in Higher Education. International Perspectives on Lifelong Learning and Student Mobility"
December 2023, Bonn

Batya Hekelman, In charge of Humanities, Arts and Education in the Academic Division at the Council for Higher Education in Israel
Higher Education in Israel
some basic data

Population: 9.8 milions

Number of Academic Students: 336,445 (average age: 22-24)

Education Budget*: 13% from state budget

Higher Education Budget: 2.6% from state budget

*not including higher education budget

Additional Facts:
% of Residents:
Jewish – 74%
Arab – 21%
Christian – 2%
Druze – 2%
PERCENTAGE OF ADULTS (AGES 25-64) WITH TERTIARY EDUCATION

- Canada: 60%
- Luxembourg: 51%
- Israel: 50%
- UK: 50%
- OECD Average: 40%
- France: 40%
- Germany: 32%
- Italy: 21%
Higher education institutions and Vocational Training in Israel operate on several levels:

- **Universities** are engaged in research and teaching for all academic degrees, in a variety of fields.
- **Academic colleges** are engaged in teaching a specific set of disciplines and awards bachelor and master degrees.
- **Professional colleges** provide training and certification in certain professions and award Professional certificates.
All Higher Education Institutes in IL are independent legal entities. Their institutional academic freedom is guaranteed by the CHE law (article 15).
THE COUNCIL FOR HIGHER EDUCATION (CHE)

25 members:
Chair (Minister of Education)
HEI representatives (min. two thirds)
Public representatives (max. 6)
Student Union representatives (max. 2)

Provides Accreditation of New Degrees and Programs
Approves the Establishment of New Institutions and Licensing of Branches of Foreign Higher Education Institutions
Conducts Quality Assurance
THE PLANNING AND BUDGETING COMMITTEE (PBC)

7 members:
5 HEI representatives (incl. Chair and one representative from a college)
2 representatives with specialization in economics

- Plans the development of the high education system at the national level
- Negotiates with the Ministry of Finance on the state budget for high education
- Allocates the budget to the high education institutions
- Ensures that institutional budgets are balanced

Exemption from academic studies based on non-academic studies (Israel)

The Council for Higher Education made a decision (22.12.2020) regarding exemption from academic studies based on non-academic studies.

An academic institution will be able to recognize, without obtaining prior approval from the CHE, up to a quarter of academic credit points based on non-academic studies and only in a bachelor's degree.

An institution will be allowed to recognize up to one third of academic credit points based on non-academic studies with prior approval from the CHE.
Reasons for this

THE LACK OF NATIONAL QUALIFICATIONS FRAMEWORK IN ISRAEL

THE COMPLEXITY OF THE VOCATIONAL TRAINING SYSTEM AND TECHNOLOGICAL EDUCATION IN ISRAEL
Currently no national system for validation exists in Israel.

A Government Resolution regarding the establishment of an NQF was adopted in 2015. An EU-Israel Twinning Project and Working Group have progressed in their tasks on defining the scope of the framework, number of levels and level descriptors, and some supporting tools.

There is no uniform Credit Key in Israel (there is no nationwide credit system and Israel is not part of the Bologna process. The general rule is to allow academic freedom and each institution decides if it wishes to invest in ECTS translation). Generally Israeli HEIs calculate credits solely by the number of weekly hours a student will spend in class as part of the course – overall workload is not considered.

There is no credit system in VET.

The main government ministries active in the field of professional training and the non-academic technological education in Israel

The system of vocational training and technological education in Israel is very complex and operates under the supervision of different authorities. The professional colleges are providing training and award a non academic diploma.
For comparison, the Academic System in Israel is supervised only by the Council for Higher Education, which serves as the only official national authority on all issues related to higher education in Israel.
Unlike in Israel, in other countries due to certain factors such as high salaries, scholarships, and the existence of National Qualification System-Vocational Training Programs have a positive image.

Due to all of those factors, and from the comparison, it is evident that the transition possibilities between the professional to academic track in Israel is quite limited, contrary to what is common in other countries in Europe.

A great difficulty of switching from a professional track to an academic track deters many from choosing to begin with the professional path.
THANK YOU
